About FleetPros

FleetPros is a non-profit industry association which strives to support fleet professionals through education, networking, and resources. FleetPros members have the opportunity to meet frequently with other fleet management professionals to exchange ideas and find solutions to common problems. The association also enjoys strong support from our associate (supplier) members. These valued associates keep FleetPros fleet members informed about the latest innovations and product developments. In return, suppliers are provided a positive environment to introduce their products and services and meet prospective clients.
